

Membuat coding edit data  
Sekarang membuat edit  
Kita double klik button edit

07.[PART7] CODING\_KODING EDIT DATA VB.NET.mp4 - VLC media player

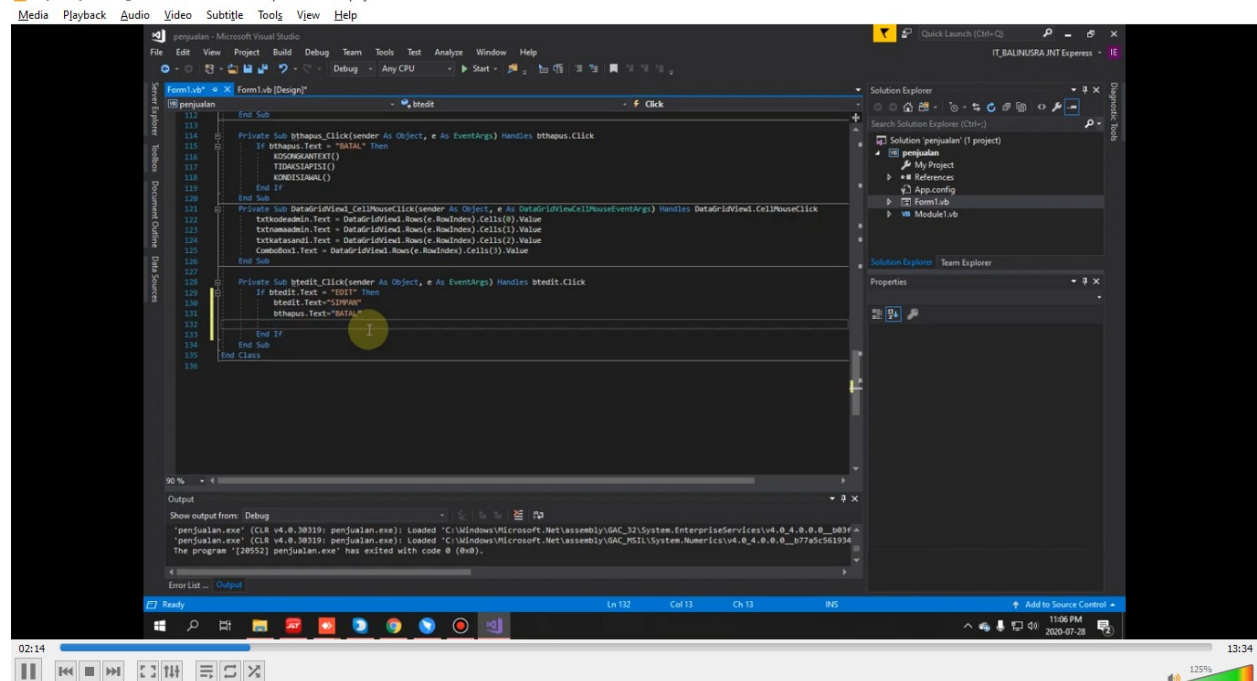

Kita buat kondisi

Jika button edit. Text maka button edit text = simpan

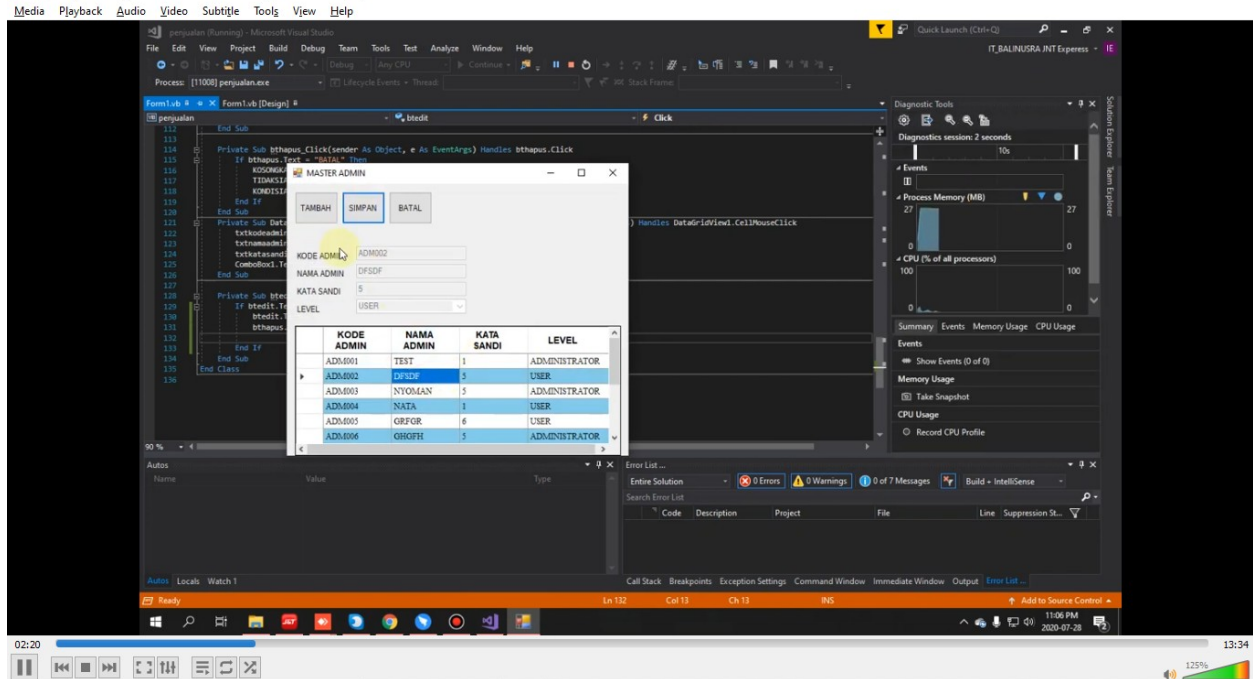

Kemudian button hapus text = batal

Dicoba run

07.[PART7] CODING\_KODING EDIT DATA VB.NET.mp4 - VLC media player

Ketika di tekan edit maka menjadi simpan

Pas klik edit tombol diubah menjadi simpan

Kemudian kita buat pas klik edit

Textbox akan menjadi true

Karna edit kodeadmin buat enable false tidak bisa diketik

Kemudian kita buat

Validasi ketika ada salah satu textbox yg kosong datanya tidak bisa disimpan  
Jadi

Else if kodeadmin.text = kosong '' maka muncul pesan

Pilih data yg diedit

Lalu

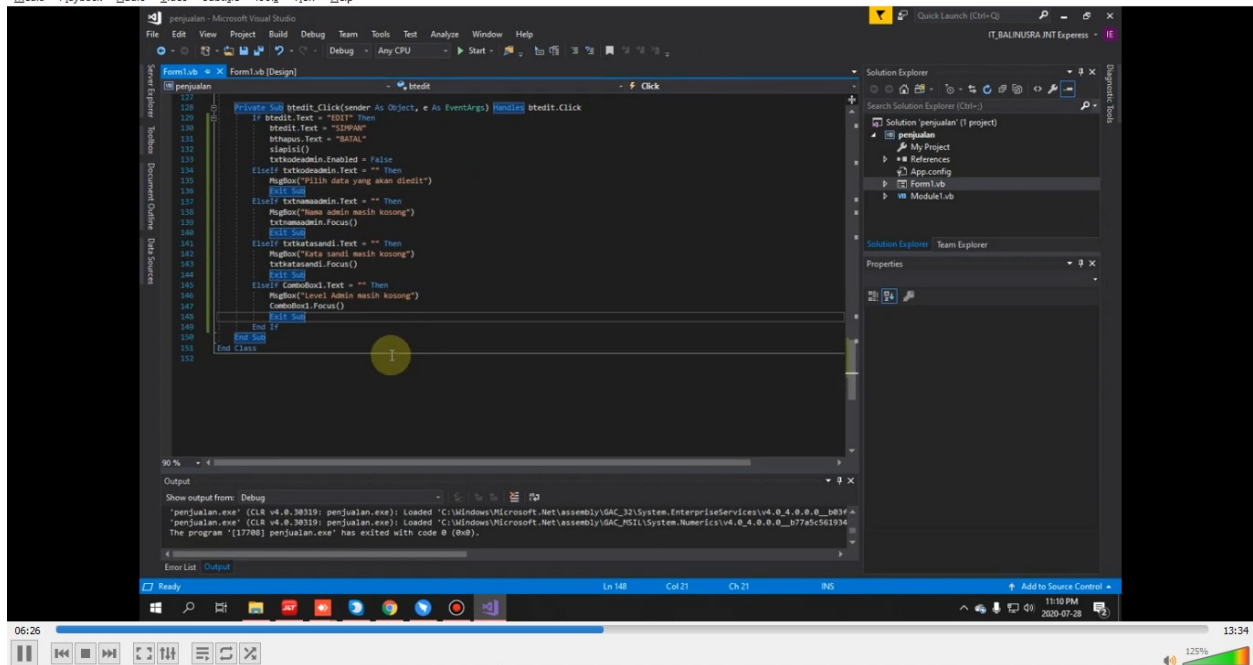

Exit sub

Kemudian else if yg lain

Jgn lupa focus nya

Lalu combo box satu nya

Jadi pas disimpan

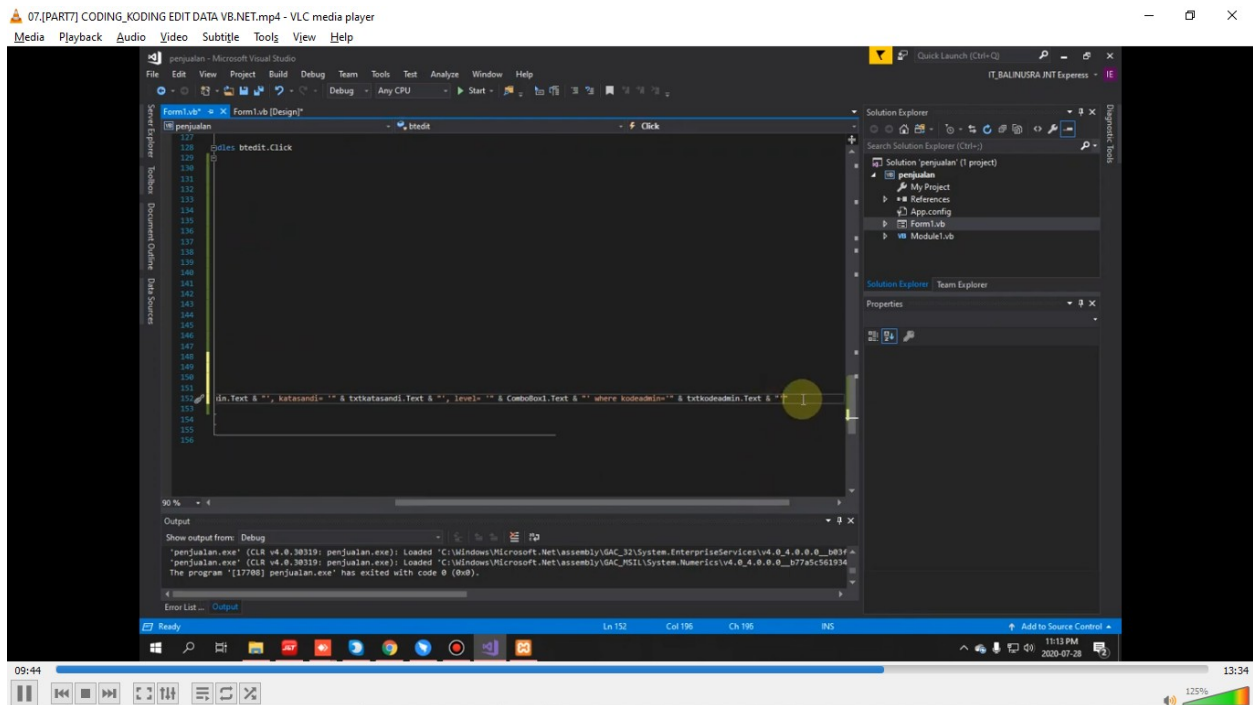

Kemudian buat proses simpan nya

Else nya kita buka koneksi databse nya

Bukadb

Buat dim edit as string

Edit="update tbl\_admin set namaadmin'" & " field yg mau update  
Namadmin

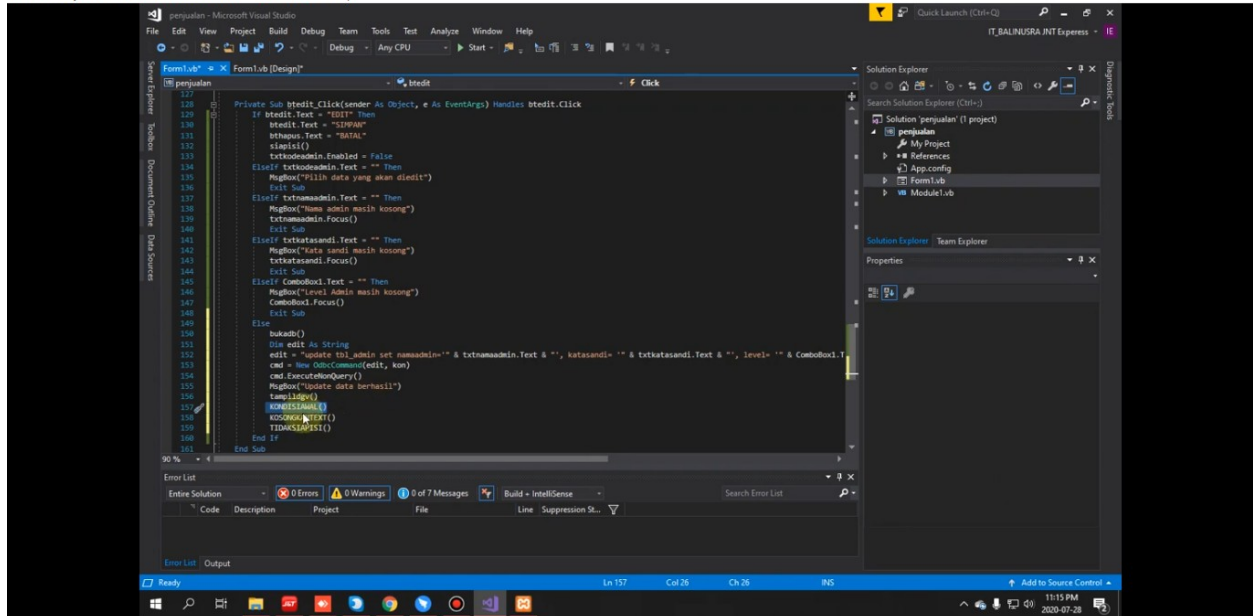

Kemudian dibawah nya  
Enter  
Cmd =new odbc  
Kemudian ketik lagi cmd  
Cmd.executeNonQuery  
Kemudian buat pesan update data berhasil  
Kemudian klik oke maka akan tampil

Tampildg  
Yaitu akan menrefresh data gridview  
Kemudian panggil kondisiawal
